

Please join us at our customer drop-in event

We'll have people there from across Southern Water to talk about:

- How we're spending money in your area to improve the reliability of our water network now and into the future.
- Working with developers on key issues such as water neutrality – helping to ensure new housing doesn't increase the amount of water taken from the local environment.
- The nature-based solutions we're introducing in the area to reduce the number of storm overflow releases across our region.
- Financial support available if you're struggling with your bills.
- What's being done to prevent blockages, pollutions and flooding in your area.
- Investigations into sewer misconnections that have caused pollutions and how we're working with partners to fix them.
- Our extensive community and schools education programme.
- Our draft business plan which outlines our investment plans for 2025–30.

Our event is family-friendly, with activities for children to enjoy.

We hope to see you there.

10am – 7pm

Wednesday 15 May

**Brighton Road Baptist Church,
Horsham, West Sussex, RH13 5BD**
