Blackstone Wastewater Treatment Works

Binnies, the contractors currently working at the Blackstone Wastewater Treatment Works, has notified the Parish Council that it is prioritising installation of new equipment at the Works, and will be working extended hours in order to complete the project as quickly as possible. Work will be carried out on Saturdays from 8am to 4pm until the end of September.

The work will involve mainly using hand tools, occasionally an excavator, to prepare the site for concrete pours. We do not expect the work to be too noisy.
